Physical Activity and Mental Health in Youth with Visual Impairment

Pamela Beach
Melanie Perreault
Who are you?
What mental health struggles do your children experience the most?

How much physical activity do you encourage your children to participate in each day?
Prevalence of Mental Health Issues in Youth

- **4 million**: American children and adolescents with a serious mental disorder
- **2 in 10 children**: 9-17 with any diagnosable mental or addictive disorder that causes at least minimal impairment
- **1 in 2**: Mental disorders that begin by age 14
- **only 20%**: of children with mental disorders are identified and treated
Mental Health and Disability

• Teens with disabilities are up to five times more likely to suffer from mental, emotional and behavioral health disorders than adolescents without disabilities.

• Youth with visual impairments have higher levels of depression and anxiety than their sighted peers (Demmin et al., 2020) as well as poorer body image (Pinquart & Pfeiffer, 2012).

• Myopic children, specifically, have higher depression and anxiety scores, and those with other causes of vision impairment have higher anxiety scores. Additionally, it was shown that children who receive corrective strabismus surgery have improved depression and anxiety symptoms.
Signs of Mental Illness

Nine signs of mental illness

What are the symptoms of a mental illness? If a friend or loved one doesn’t seem themselves, how do you spot the difference between a bad mood and something more serious?

- Feeling anxious or worried
- Feeling depressed or unhappy
- Emotional outbursts
- Sleep problems
- Weight or appetite changes
- Quiet or withdrawn
- Substance abuse
- Feeling guilty or worthless
- Changes in behaviour or feelings

If you think there is an immediate risk of suicide or self harm, dial triple zero (000)

If you’re concerned about a friend or loved one, ask them how you can help. The first step for them should be to see a doctor or other healthcare professional.
Factors that Shape the Mental Health of Young People
Factors Impacting Youth with VI

• Students with visual impairments may be more likely to experience anxiety due to factors such as navigating social and physical environments and accessing materials.

• Students may miss unseen messages such as facial expressions, eye contact, and gestures which could lead to confusion and cause anxiety.
Physical Activity and Visual Impairment

Youth with visual impairments have lower levels of physical activity and higher levels of sedentary time than their sighted peers (Brian et al., 2018).
The Benefits of Exercise on Mental Health

- Reduced stress levels
- Increased energy levels
- Increased well-being
- Boosts brain power
- Reduced depression
- Increased confidence
- Increased mood
- Reduced anxiety
- Increased self-esteem
- Improved sleep
Physical activity and mental health

Being physically active:

- Protects against mental health problems
- Decreases depression in older adults
- Reduces the symptoms of post natal depression
- Is as effective as medication for mild to moderate anxiety and depression
- Improves self-esteem and cognitive function in young people
- Playing sport reduces psychological distress by
  - 1-3 times a week: 34%
  - 4+ times a week: 47%
- People who participate in sports clubs and organised recreational activity enjoy better mental health.
How Can You Help?

- Adults in a school environment may be the first to notice changes in a student’s attendance, behavior, and achievement.
- **Good communication** between home and school can be the first defense in identifying when intervention is needed.
- Start by building **positive relationships** and having productive conversations with your students’ families.
- Come from a place of **empathy and compassion** and keep the focus on working together to connect families with the best possible resources to help the student.
PHYSICAL ACTIVITY CAN HELP

- Be active during commercials
- Ride a bike or handcycle
- Walk or run to school
- Play a game

Physical Activity is for EVERYbody
Physical Education and Sports for People with Visual Impairments and Deafblindness: Foundations of Instruction

Lauren J. Lieberman, Paul E. Ponchillia, and Susan V. Ponchillia
Sport Inclusion Video Series

- Track
- Cross Country
- Swimming
- Basketball
- Soccer
- Wrestling
- Tennis
- Beep baseball and Kickball
- Volleyball

Supported by Lavelle Foundation
